POSEIDON SHOWERFITTINGS

All functions combined in one design line - this is how the Poseidon Shower Fitting is best characterised. Whether Standard, In-Swing/Out-Swing or Lift'n-Sink function - all elements, whether angle or hinge, fit together.

This means there are no more limits to creativity and flexibility in modern Shower Design.

The Poseidon Shower Fitting is made of solid, sanitary brass with a high-gloss chrome finish - and it's all "Made in Germany". "Made in Germany" means that the fittings are produced in Germany according to ISO 9001.2015 and tested in-house according to DIN EN 14428.

We are very proud of this development. Because it guarantees continuity and planning reliability in development, production, sales and assembly.

DO NOT GIVE DIRT AND LIMESCALE ANY SURFACE TO ATTACK!

The shower enclosures made with Poseidon Shower Fittings are frameless, durable, easy to clean and hygienic. We achieve this by keeping all hardware outside the wet area. Inside the shower area, there is only the flush-fitting screw connection.

Poseidon - the Shower Fitting for all occasions!

The advantages at a glance

- Flush-mounted glass
- Cost-effective glass processing due to countersunk hole without complex and expensive glass cut-out
- Simple and precise installation
- Generous adjustment possibilities in the cone
- No visible screw connections
- Bright chrome-plated covers made of solid brass
- Lift'n-Sink mechanism / now with lever-out safety device
- Infinitely adjustable zero position
- All fittings - one design
- Almost all installation variants possible
- Continuous Door Seals (better shower tightness)
- Easy-to-clean and hygienic because the fitting is outside the wet area
- Manufacture, assembly and testing in Germany

TECHNICAL ADVICES

Usage

Poseidon shower fittings are designed for 8 mm toughened safety glass (ESG). In exceptional cases, the glass thickness can be adapted to 6 mm or 10 mm in consultation with our technical department.

Poseidon shower fittings are not suitable for swimming pool, sauna or steam areas!

Installation

All shower door hinges and angle connectors must be installed horizontally and plumb.

The maximum load-bearing capacity for shower door hinges must not be exceeded.

Ensure that the masonry is load-bearing and flat.

Assembly using Allen key SW 6 mm, torque max. **25 Nm**.

Installation should only be carried out by qualified personnel.

We accept no liability for the installation.

Fixing Material

A load-bearing substrate is a prerequisite.

Screws and dowels should be adapted to the structural situation.

We recommend countersunk screws 6 x 60 mm made of A2 or A4 stainless steel with suitable dowels.

Door Seals

Poseidon Shower Fittings basically require installation using Door Seals. Corresponding Notes/recommendations can be found on the individual data sheets.

Maintenance Advises

Sharp, aggressive or abrasive cleaning agents (e.g. alkaline, chlorine-containing, acidic, solvent-containing, steel wool etc.) must not be used.

Sink hole

The dimensions given are recommendations for the optimum incorporation of the cone into the glass.

Dimensions valid for all shower door hinges (unless otherwise stated):
