THE
HIGH
PERFORMANCE
GLASS

MAINTENANCE

UNRIVALED EASY-CARE AND HYGIENICALLY CLEAN

Thanks to the exceptional ease of care of **FlexoTop® HighPerformance Glass**, fresh cleanliness and optimum hygiene can be achieved even without aggressive cleaning agents (pH value outside 0.5-10) and abrasive cleaning equipment*.

CLEANING AND MAINTENANCE

FlexoTop® HighPerformance Glas is smooth, homogeneous and stable and therefore resistant to all common household acids and alkalis. We recommend removing any residual water from the glass after every shower and using a soft, non-scratching sponge or cloth (e.g. microfiber cloth) and a Flexotec cleaner for routine cleaning.

MAINTENANCE KIT

The MAINTENANCE KIT for shower and bath contains all the necessary components to maintain the surface protection (Active Cleaner Concentrate) and to regenerate the protective layer if necessary (AktivSchutz).

GALAXY SUPERSANITÄR CLEANER

Ready-to-use, sprayable cleaner that does what it promises. Galaxy SuperSanitary Cleaner effortlessly removes limescale and soap residue throughout the bathroom.

* The use of the following very aggressive cleaning agents, which can scratch surfaces and thus damage the surface protection, should be avoided at all:

- Scouring milk or scouring powder and powdered toilet cleaners
- Highly concentrated drain cleaners
- Fittings and steel cleanersSurface

Damaging or abrasive cleaning tools must also not be used.
